

CeramOptec at the *Laser World of Photonics India* and the *enova*

Over the coming weeks, CeramOptec will be represented at the **Laser World of Photonics India** in Bangalore (India) and at the **enova** in Paris (France). At both of these trade fairs, CeramOptec will be presenting its wide portfolio of various fibers, cables and bundles in cooperation with the regional distributor at the stand.

Optran® UV NSS fiber

The Indian cooperation partner is **New Age Instruments & Materials (P) Ltd**, based in Haryana, Gurgaon (India) and represented by Mr Tapan. The Optran® UV NSS and Optran® UV NCC fibers will be the focus of the trade fair presentation at **Stand No. 2045**.

In France, CeramOptec will be presenting at **Stand Number H25** together with the distributor **Optical Business & Services – Fiber**, based in Les Ulis, France, and represented by Mr Corceiro. Here too, the focus will be placed on Optran® UV NSS and Optran® UV NCC fibers.

Rectangular cross-section of the Optran® UV NCC

Both trade fairs represent an important point of contact for the respective industrial branches of France and India. CeramOptec wants to set up or further expand these markets. For this reason, the maintenance of existing customer relationships but also contact to potential new customers will be CeramOptec's primary objective during the presentation at both trade fairs.
