

CeramOptec at *Laser World of Photonics China* and *Photonics North*

CeramOptec participated in the Laser World of Photonics China 2019 trade show in Shanghai at the end of the first quarter. The company was part of the “Made in Germany” pavilion at this international exhibition featuring a wide range of products. More than 1000 exhibitors from 26 countries showcased their products and services to 65,000 trade visitors in five large areas.

The "Made in Germany" pavilion

CeramOptec's broad product range met with great interest and attracted numerous visitors. A large number of expert discussions were held and contacts made. The CeramOptec GmbH staff from Germany was supported by their colleagues from the Chinese subsidiary.

Another very interesting event took place from 21–23 May 2019 in Québec City, Canada: Photonics North 2019.

Photonics North is an important trade show for high-power laser technology, biophotonics, and sensors. It also offers a large number of presentations from international lecturers and includes various conferences.

CeramOptec took part as a visitor to the fair and was able to make numerous interesting contacts and learn about current developments in the industry.
